Unusual Observation Report (UOR) may be required; please make field notes

INSTRUCTIONS: This record sheet lists the species more likely to be found within the Hunter Region. Additional space is provided for reporting any species not listed. Use one sheet for each 10-minute grid — if in doubt as to grid boundaries, use a new sheet for each location. Record all species present, indicating **exact numbers** if possible. Otherwise, use the approximations **A** = 1-5 birds present, **B** = 6-20 birds, **C** = 21-50 birds, **D** = 51-100 birds, **E** = over 100 birds, **X** = not counted, **H** = heard only. All records of Category 3 bird species require an Unusual Observation Report (UOR) to be completed; for Category 2 species, a UOR may be requested if species are present in unusual numbers, location or season. Species which appear on the NSW Threatened Species List are indicated thus: **Bold** - observation reports of these species may assist in development of management strategies for NSW.

BREEDING RECORDS: In the second column, please indicate any observed breeding behaviour, using the abbreviations **ny**=nest with young, **ne**=nest with eggs, **fs**=fecal sac, **on**=bird on or seen leaving nest, **nb**=nest building, **cf**=carrying food, **ffy**=feeding fledged young, **ih**=inspecting hollow, **di**=display, **co**=copulation.
