DATE:/	Start time:	Finish time:	Area surveyed: (i.e. 2ha or 500m or 5km)
WEATHER CONDITIONS:			
LOCATION:		Co-ordinates: (Please use WGS84)	

INSTRUCTIONS: This record sheet lists species most likely to be found within the Hunter Region. Use a new sheet for each new location. Record all species present, giving exact numbers where possible, or the range estimates otherwise. See the bottom of page 2 for additional information. Species which appear on the NSW Threatened Species List are highlighted orange: your reports of them can assist in developing improved management strategies. The additional species highlighted in green (Category 2 species) are of special interest for the Hunter Region; records of these are very important to the Hunter Bird Observers Club.

OTHER PASSERINES An Unusual Rec Form (URRF) may be required; please a detailed field notes		ort

INSTRUCTIONS: Record all species present, giving <u>exact numbers</u> where possible. Otherwise, use approximations **A** = 1-5 birds present, **B1** = 6-10 birds, **B2** = 11-20 birds, **C** = 21-50 birds, **D** = 51-100 birds, **E** = over 100 birds, **X** = not counted, **H** = heard only. **BREEDING RECORDS:** In the second column, indicate any observed breeding behaviour, using the abbreviations **ny**=nest with young, **ne**=nest with eggs, **fs**=fecal sac, **on**=bird on or seen leaving nest, **nb**=nest building, **cf**=carrying food, **ffy**=feeding fledged young, **ih** =inspecting hollow, **di**=display, **co**=copulation.

Additional space is provided for reporting species not listed. Note that such records mostly will be for species which are rare locally (i.e. **Category 3** species for the Hunter Region) and you will later be requested to fill out an Unusual Record Report Form (**URRF**). Please make detailed field notes at the time of observation – these will help you to complete the URRF. Note that an URRF may also be requested for **Category 2** species if they are reported to be present in unusual numbers, location or season.
