

APPENDIX to Same, same but different: A comparison of two bird surveys in urban Forster, New South Wales by Ashley J Carlson The Whistler 19 (2025): 23-34.

Avifaunal list recorded from south Forster between January 2001 and April 2006 and November 2008 and April 2012 (Hind Avenue) and June 2012 and May 2021 (Gleneon Drive). No. = number of months the species was recorded and RR = Recording Rate ratio. Species recorded breeding are shown in **bold**. Seasonal RR are shown as percentages for Spring (Sp), Summer (Su), Autumn (Au) and Winter (Wi). Species recorded as Migrants (Mig) are shown as either a Summer Migrant (SM) or Winter Migrant (WM). A summary of statistical test results for Significant (S) and Highly Significant (HS) differences in recording rates is shown. For further information on data shown, refer to the main document.

Common Name	Scientific Name	Hind Avenue Survey Area										Gleneon Drive Survey Area										Statistics
